

I live in central Kentucky and am a three year listener of K-LOVE radio found on my local FM radio stations, 89.9, 96.3 and 104.3. I have been notified that a change may take place regarding the broadcast service known as Low Power FM or (LPFM) which could directly affect receiving the K-Love signal, currently carried over FM Translator service.

K-Love is truly more than an entertainment station to myself, my family and our friends. It is listened to by thousands of people just in the area we live in and frankly for many of us, it is the only radio programming we listen to. It is safe, clean, family friendly radio that is currently available to us throughout the United States. The fact that no matter where we go we can usually find a K-Love station to listen to is extremely comforting.

If the changes being considered regarding LPFM vs. FM translator service, cause us and the many people we know that listen to K-Love to lose their signal, it will be a tremendous blow to us all.

Please leave the FM Translator Service intact and allow us the freedom of listening to K-LOVE.

Thank you for your consideration.

Sincerely,

William P. Earnest
